

		ISOLDE WEEK 48 + 49									
		RILIS	GPS	HRS	CAO	ICIS	p's	Visits	other		
Monday	25-11	night	6:00 Stop of protons	Careful heating of target to not lose ions, separator setup	GPS						
		AM	Switch to RC4 at 30 keV? Quad scans until 13:00								MD beam gates Jordan and Line, no central beam line
		PM	13:00 REXTRAP MD								
Tuesday	26-11	night		Setup to CRIS (30 keV) - U or TaO (TBC) Setup to IDS (50 keV), if time permits beam tune to IDS 16:30 Switch to CRIS Beam tune to CRIS + optimise with stable					9:30 - 12:30 Women in Technology photo shoot		
		AM									
		PM									
Wednesday	27-11	night									
		AM									
		PM									
Thursday	28-11	night		IS735 - 221Fr - CRIS 30 keV	HRS						
		AM									
		PM									
Friday	29-11	night									
		AM									
		PM									
Saturday	30-11	night									
		AM									
		PM									
Sunday	01-12	night									
		AM									
		PM									
Monday	02-12	night	Ac	Laser setup + switch to IDS							
		AM								Continue beam time IS741 - 221Fr + 225Ac - IDS	
		PM									
Tuesday	03-12	night	9:00 REXTRAP MD	Stop 9:00 11:00 #877	GPS						
		AM									
		PM									
Wednesday	04-12	night	9:00 #863-MK1(Ta) plug target	Fluorination Setup to CRIS Beam tune to CRIS							
		AM									
		PM									
Thursday	05-12	night		IS758 - 226RaF - CRIS - 30 keV							
		AM									
		PM									
Friday	06-12	night			HRS						
		AM									
		PM									
Saturday	07-12	night									
		AM									
		PM									
Sunday	08-12	night									
		AM									
		PM									
Monday	09-12	night		Stop 9:00 11:00 #864-VD5 plug target							
		AM									
		PM									

GPS: #878-MK1(Ta) (STI responsible: Matthias).

HRS: #877 used for 144Ba run at Miniball/ISS- cold irradiation. #865-UC-MK1(Ta), used for COLLAPS 54Ca run.

Operations responsible: Erwin (164585) until 25/11. Lefteris (166707) until 3/12. Erwin (164585) until 9/12.
