Summary of week: Commissioning of LE beamlines from HRS target. On GPS TISD run on actinide development. Request may also be made to take beam from GPS target to central beamline to verify reference setups from previous unit.

GPS: #652 UC LIST for LOI243. Setup to GLM. HV = 30kV. Beam development for actinides. Main activities during day, occasional nights may also be required. Beam to Magnetof at GLM.

HRS: #786 Target for reference setups. HV = 50kV. Possible time for tuning to specific setups if required/possible.

Protons: NORMGPS up to 2uA throughout week, but most likely not continuously.

Operations responsible: ERwin (164585) until Tuesday March 28th. Simon (165711) till Tuesday 4th April
