Summary of week: On HRS, the week continues with the RaF run on CRIS. On GPS, the 110Ag test on GLM finishes Tuesday morning after which the target is changed. Wednesday morning, setup for 226Ra collections at GLM and beam to users when ready. Both runs stop Monday morning to be ready for target change.

GPS: #845 target with irradiated Ag wire for 110mAg test; #817 pre-irradiated target (29/10/2023) for 226Ra (50 keV), **careful heating** guided by target team.

HRS: #826 UC W for RaF to CRIS @ 30 keV. Was used in week 24 already. First Fr, afterwards fluorination for RaF, guided by target team.

Protons: Winter physics

Operations responsible: Simon (165711) until Tuesday 14 November. Alberto (167538) until Tuesday 21 November.
